

## Customer List Off-the-shelf Reports, Publications and Databases

Juniper's publications have been sold round the world to private corporations, consultancies, process suppliers & operators, finance houses, academic bodies, governments and public authorities.

Juniper's renowned report *Pyrolysis & Gasification of Waste: a Worldwide Technical & Business Review*, established the company's reputation for authoring unbiased, independent and comprehensive reports.

In August 2006, **WasteReports.com** was launched. This separate website enables the customer to purchase from our growing range of off-the-shelf reports at any time of day, most reports being in downloadable pdf format.
